2D and 3D drafting software AutoCAD Crack-based software: Autodesk Toolbook, a 2D vector-based drawing application Autodesk SketchBook Pro, a 2D vector-based drawing application Autodesk Vectorworks, a product line of 2D and 3D vector-based design and drafting software Autodesk 3D Studio Max, a 3D modeling and animation software package Troubleshooting If you run into trouble and cannot find answers on the web, you may consider posting questions on Autodesk User Community. Crash Autodesk occasionally allows the use of alternate operating systems in an attempt to increase the reliability of their software. If you have AutoCAD on Windows XP, Vista, or 7, you are eligible to request the use of Windows 8 instead. To request the use of an alternate operating system: Download and install the alternate operating system on a spare hard drive, or replace your primary hard drive with the spare drive. Install a clean copy of Autodesk software on the newly installed operating system. Back up all user and system files before performing a clean installation. The same will apply to your user data (which includes all Autodesk drawings) and any previously installed third-party software. Update the software. The alternate operating system should be available immediately after the clean installation. You may have to update your graphics card driver before your computer will be able to run the alternate operating system. Diagnostics/error reporting Autodesk has created a web-based utility for diagnosing and reporting problems with AutoCAD products. The web-based utility includes a Repair Diagnostic Tool, and the option to save the Repair Diagnostic Tool response as a PDF. The following link will take you to the Repair Diagnostic Tool: [Microsoft Windows OS](#) Every major release of Autodesk's software since AutoCAD 2008 also included a major update to Windows. A major Windows update can cause AutoCAD to "freeze" during startup. If you run AutoCAD after updating Windows and it will not start up normally, follow the steps below to troubleshoot: Open the Windows Task Manager by pressing "Windows-Pause", or by pressing Ctrl+Alt+Delete Make sure the process "winlogon" is not running. In the task manager, search for a1d647c40b

AutoCAD Free License Key (Latest)

Press alt, tab and then alt, tab again until you get to the Task Manager window. Click on File -> New Task (or use ctrl+n). Choose the option to Run a Program or a File (you can also choose Run) and then enter "%AppData%\Autodesk\Autocad.exe". You can also use the registry key Useful registry keys To solve and run the 'duplicate file name' issue with AutoCAD: Start -> Run -> regedit -> search for "autocad" In the right-hand column of this window, choose "Edit" In the bottom-left column, find the registry key named: HKCU\Software\Microsoft\Windows\CurrentVersion\Run Look for the "Command" line. You'll find "C:\Program Files\Autodesk\AutoCAD 2010\acad.exe" Change this to this: "C:\Program Files\Autodesk\AutoCAD 2010\Acad.exe" Q: How to use dojo.query on a ajax loaded HTML I need to build a dojo widget that will load HTML from the server dynamically, and add it to the existing DOM. My current attempt is as follows: require(["dojo/query"], function (query) { var el = dijit.byId("myId"); query(".listitem", el) .addClass("listitem_selected"); }); this works fine. Now I add the content via an ajax call (calling an API): require(["dojo/request", "dojo/store/Memory"], function (request, Memory) { request("", { handleAs: "json" }).then(function (response) { Memory.put('myModel', response.myModel);
