Songtrip

Songtrip Activation Code uses your music folders and mood to build playlists. It's not a downloader, so don't count on that, have your folders ready. It helps with your randomizer, a feature that generates playlists using metadata to find related songs. It works as a basic playlist creation and mood-detection program. A: Flutter Music Player and Canoo Music Player have a public API that give you this feature: The CW has released an official trailer for its 12th season of *The Vampire Diaries*, confirming that the series will return in 2015. The CW announced earlier this month that *The Vampire Diaries* would be returning for a farewell season, with the network saying that it would be back for 10 episodes. Season 12 will premiere in 2015, with The CW noting that "Final episodes will be filmed in the summer of 2015 in Vancouver, Canada." *The Vampire Diaries* first aired in 2009, telling the story of Elena (Nina Dobrev) and her search for her true love, Stefan (Paul Wesley), as they try to undo the damage she has done by bringing other vampires into the world. It is produced by Bonanza Productions Inc. in association with Alloy Entertainment, Warner Bros. Television and CBS Television Studios. The 12th season will include a two-hour, special holiday episode, which could be a Christmas episode and feature a story that will have significant repercussions throughout the rest of the season. In addition, the show is also developing two spinoffs, a comedy series focusing on Elena's (Dobrev) college life and a series focusing on Damon's (Ian Somerhalder) new love, Rebekah Mikaelson. *The Vampire Diaries* was one of the most successful series in the CW's

history, consistently ranking among the network's top shows and for the last several years, the show has received nominations for a People's Choice Award for Favorite Soap Opera and Primetime Emmy nominations for "Outstanding Drama Series" and "Outstanding Lead Actor in a Drama Series." This year saw the simultaneous hijacking of the Republican and Democratic Parties and banking interests have pushed both parties into financial and electoral ruin, while U.S. politicians attempted to use the enormous deficit as an excuse to blame capitalism and American businesses for their own failures. softwareRetrospective Cohort Analysis of Factors Affecting

Outcomes Following Partial Vocal Cord Paresis in Dogs

with Dog-Biting Vocal Cord Paralysis. To determine how various patient variables affect clinical outcome following partial vocal cord paralysis (VCP) associated with dog-biting VCP. A retrospective cohort study. Dogs (n = 18) with unilateral (or bilateral) VCP from an 11-year period.

Medical records (2004-2015) of patients with VCP and exposure to a dog were reviewed. Clinical outcome was classified as a success when the VCP resolved and a failure when VCP was not resolved or resolved after surgery.

Variables investigated included signalment (age, breed, sex), duration of VCP, duration of neuropathy before presentation, duration of delay to presentation, severity of medical comorbidities and the presence of medications.

Odds ratios (ORs) and 95% confidence intervals were calculated and compared between variables. The median age was 8 years, and the median duration of VCP was 5 months. The median duration of delay to presentation was 3 days and the median severity of medical comorbidities was score 1. The presence of concurrent obstructive uropathy was associated with a good outcome (OR, 0.23; 95% confidence interval, 0.06-0.88), but a delay of 3 days to presentation was associated with a poor outcome (OR, 7.86; 95% confidence interval, 1.08-55.05). The presence of concurrent occlusive disease was associated with a poor outcome (OR, 30
