Why 404 This is my code to access a php file on internet domain (function getUserInfo(){ $.ajax({ type: "GET", url: "", dataType: 'json', success: function (response) { document.write(response); setTimeout('showUserInfo()', 5000); } }); } And it will display GET 404 (Not Found) I don't know why. I also try access to other php file on internet domain, all work well. A: The error is occured because of an missing slash. url: "", should be url: "", Q: Page Layout versus Div Layout I'm just starting out creating websites. What are the differences? I've just read that with a div layout it's not easy to add padding and such, that's why it's better to use the page layout. And for a side note, do you use any specific webdesigning software, like photoshop? A: The way html is designed, you have three dimensions, width, height and a depth, and you build an html document from these three dimensions. The main function of html is to describe the structure of the content and the way it is organised. To

Category Archives: Kansas So far today I've seen like two and a half kicks to the face but luckily all that is from behind the goal line. Three time zone to go and the wind is getting closer. Let's see if I can even remember this. Yet, another week of writing and from next week until Independence Day, I will be flying the Rockies. Well not really… but I'll be in Silverthorne, Colorado. I figure the vacation will be a good way to ease all the cobwebs and will hopefully get me planning the trip for next year's trip. The teen group will attend Colorado for our Foothills trek as well as the Glades Challege, so I might as well do it now. As a result of these trips, I'll be leaving my blog bookmarked on my computer in Beaver this week. I'll be doing early release posts if anyone is interested in listening. Colorado is truly a beautiful place and as a mother of four, I am starting to realize it. Granted, I've seen beautiful places before, but this one is really special. The mountain are capped in snow from the last couple of weeks. It's quiet, the hiking is amazing and we might even see some bighorn sheep. I knew Colorado was good when I rented the Mesa for three days and took week-long hikes. I was coming home to Beaver Springs every night so it didn't matter much, but I knew that I needed to see this beautiful state. When I lived in Corvallis, Oregon, I heard about this hike called the Mosquito Slayer that takes you to a waterfall in the Columbia Gorge and named after mosquitos that come from the Columbia. It's a pretty long, 12 mile hike that has a zig-zag roller coaster ride high up in the ridge. I'm confident I can complete it because I have already gotten a long weekend out of a half of a month away. On Friday, I will be to Sargents Gorge back in Beaver Springs, so it's like a 20 mile walk. I'll have to wear a watch because people who drove all the way to a waterfall will be smoking a lot more than I will. It should be plenty of water because Mt. Hood has been getting up to 35 or 40 degrees. I have reservations for their hotel because I�

– Real-time Jumping and Platforming: Jump to, slide under, curve around, and leap over any obstacles in your way. Grab on to handles, ropes, or platforms to help you overcome all kinds of obstacles. The more of these that you collect, the better your score will be. And every time you jump, you will climb higher and higher. – Hardcore Platforming: Customize your own adventure with levels that you can change (and redo) endlessly. The game adds no specific levels or items. Instead, it offers the challenge of hard platforming: you choose the path and make your jumps on the fly. The path you take will be different every time you play. – Charming Characters: The little chatterbox on your shoulder will tell you when to jump, and he's also a valuable asset when it comes to collecting keys. – Cool Sounds & Graphics: Great sound effects and detailed graphics that will move you to tears, not to mention the game's three beautiful musical scores. – Intense Survival: A reflex-busting real-time platforming experience that will capture the audience with its addictive gameplay and high tension. Discover other indie games from the developer's previous games, "Switch Hero", "Hero of Boys" and "King of Thieves" AppSpy takes a look at AG Drive in their latest video review. Giving it top marks and only dinging it for not having multiplayer. If you like "high-speed car robots" this one might be the one. PlatinumGames: "A look into the production of a new action game for the Wii U" PlatinumGames are behind Ghosts 'n' Goblins and the upcoming HD remake of Golden Axe for Wii U. They gave some insight into what they've been working on over the last two years: Development started about a year ago, and we're now about a year later, and just recently we finished up on everything on the Wii U. We have a lot of things that are on the table, one of them is to expand on the series and bring it to a new generation of hardware that we have on hand. We'd like to add elements to the game to showcase what we can do with this hardware. Aside from being fun and easy to control, we also took great care to design the game to be easy to pick up, but also quite deep
